

Please

DON'T FEED THE HORSES

Recently, there have been increased reports of horses being made extremely ill and in some cases dying because members of the public have fed them.

Grass cuttings and any other types of plants can make horses extremely ill.

Horses are incredibly sensitive and even small amounts of the wrong food can be fatal.

Please don't touch horses as they may mistake your fingers for food and accidentally bite them.

Leave gates and property as you find them or follow the instructions on any signs.
Remember to also keep dogs on a lead.
